

**IN THE CLAIMS**

This listing of claims will replace all prior versions, and listings, of claims in the application. An identifier indicating the status of each claim is provided.

**Listing of Claims:**

1. (Currently Amended) A portable information terminal apparatus comprising:  
acquiring means for acquiring a plurality of pieces of program information;  
first display controlling means for controlling display on a display screen of said program information acquired by said acquiring means;  
extracting means for extracting a time included in said program information;  
retrieving means which, based on the time extracted by said extracting means, retrieves other program information about programs to be broadcast in a time slot relative to said program information; and  
second display controlling means for controlling display on said display screen of said other program information after retrieval by said retrieving means,  
wherein said acquiring means acquires said program information by issuing a request including a unique user ID and acquires said program information applicable to the user ID.
  
2. (Original) A portable information terminal apparatus according to claim 1, wherein said time is a broadcast start time.

3. (Original) A portable information terminal apparatus according to claim 1, further comprising third display controlling means which, if any program name is selected by a user performing an operation from among said other program information displayed on said display screen under control of said second display controlling means, then controls display on said display screen of detailed program information about the selected program information.

4. (Original) A portable information terminal apparatus according to claim 1, wherein, if said other program information cannot be displayed entirely at one time on said display screen, then said second display controlling means calls up an undisplayed part of said other program information for display based on an operation performed by a user.

5. (Currently Amended) An information processing method comprising the steps of:

acquiring a plurality of pieces of program information by issuing a request including a unique user ID and acquiring said program information applicable to the user ID; firstly-controlling display on a display screen of said program information acquired in said acquiring step;

extracting a time included in said program information;  
retrieving, based on the time extracted in said extracting step, other program information about programs to be broadcast in a time slot relative to said program information; and

secondly-controlling display on said display screen of said other program information after retrieval in said retrieving step.

6. (Currently Amended) A computer-program storage medium which stores a computer-program which is readable by a computer, said computer-program comprising the steps of:

acquiring a plurality of pieces of program information by issuing a request including a unique user ID and acquiring said program information applicable to the user ID;  
firstly-controlling display on a display screen of said program information acquired in said acquiring step;  
extracting a time included in said program information;  
retrieving, based on the time extracted in said extracting step, other program information about programs to be broadcast in a time slot relative to said program information; and  
secondly-controlling display on said display screen of said other program information after retrieval in said retrieving step.

7. (Currently Amended) A recording medium storing a computer-readable program for causing a computer to execute the steps of:

acquiring a plurality of pieces of program information by issuing a request including a unique user ID and acquiring said program information applicable to the user ID;  
firstly-controlling display on a display screen of said program information acquired in said acquiring step;  
extracting a time included in said program information;

retrieving, based on the time extracted in said extracting step, other program information about programs to be broadcast in a time slot relative to said program information; and

secondly-controlling display on said display screen of said other program information after retrieval in said retrieving step.
